

What's new in Tareekh 2.4

AI for whole cases and for finding cases, at the lowest AI cost

Tareekh 2.4 brings AI to whole cases and to finding cases, at the lowest possible AI cost: every order is read **on the phone** (straight from the PDF; OCR only for scanned pages), kept as text, and indexed on the phone, so only the passages that matter are sent to the AI service you connected. The pictures use made-up example cases.

Case synopsis

- Date-wise, from all saved orders
- English, বাংলা or हिन्दी
- Cost shown before it runs
- Each order summarised once; updates cost only new orders

Ask about this case

- Questions about the whole case
- Only matching passages are sent
- Found on the phone by words and by meaning
- Every point names its order date

Ask AI to find a case

- In your own words, or from a summons
- Checks your saved cases first
- Suggests the exact searches
- Tips for cases hard to find

Ask AI about my cases

- "My High Court matters this month"
- "Lower court hearings next week"
- Answer plus the cases, to tap

Cause lists in plain words

- "Calcutta Original Side tomorrow"
- Court, bench and date picked for you

Lower AI cost everywhere

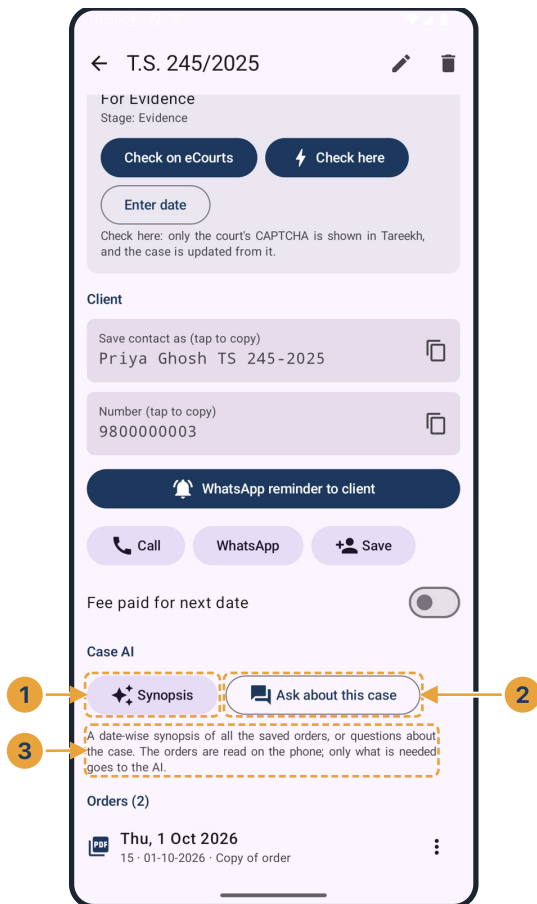

- Orders read straight from the PDF (no OCR when typed)
- Text only, no page pictures
- Repeated headers and signatures removed
- Optional economy model for summaries

How the cost is kept low. A typed order is read from the PDF itself; OCR runs only on pages that have no text. The text is cleaned and split into short passages, kept on the phone with a keyword index and meaning vectors made on the phone. A question sends only the 5 to 8 passages that match it; a synopsis summarises each order once and builds on those summaries. The AI services can only read words, so the passages themselves are sent, never the whole set of orders.

How to use it

1. Connect an AI service in Settings (Gemini, OpenAI, Claude, Qwen or Kimi) with your API key.
2. Open a case: **Synopsis** or **Ask about this case**. Check the cost, then tap Write.
3. Search tab: **Ask AI to find a case**, in your words or with a summons attached.
4. Cases tab: **Ask AI about my cases**. Cause lists tab: type the list you want.

Screen by screen

Case AI, on every case

Two new buttons on every case, above its orders.

1

Synopsis

A date-wise synopsis of the whole case, from all its saved orders.

2

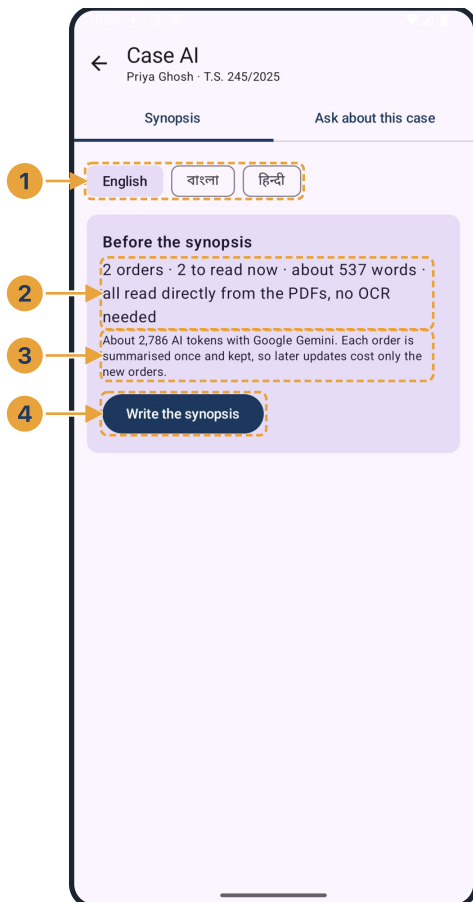

Ask about this case

Questions about the case, answered from the orders that matter.

3

Read on the phone

The orders are read on the phone; only what is needed goes to the AI.

Before the synopsis: the cost

Tareekh first reads the orders on the phone and shows what the synopsis will take, before anything is sent.

1

Language

English, বাংলা (Bengali) or हिन्दी (Hindi).

2

No OCR needed

Typed orders are read straight from the PDF; only scanned pages need OCR, and Tareekh says how many.

3

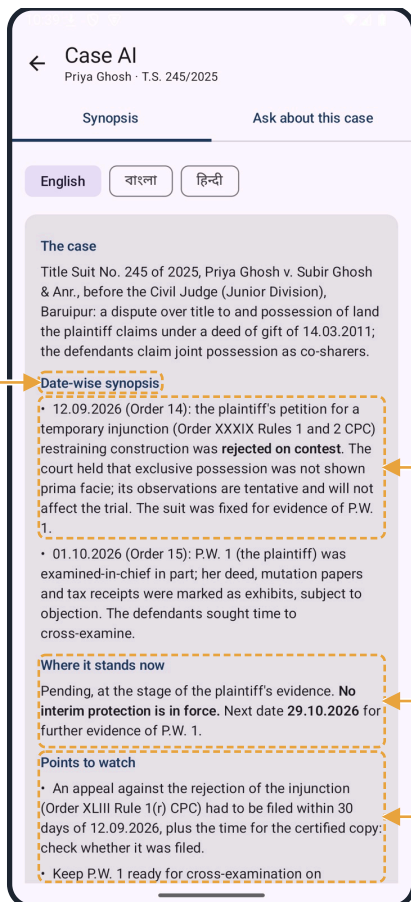

AI tokens

An estimate before you start. Each order is summarised once and kept.

4

Write the synopsis

Nothing is sent until you tap this.

The synopsis

Date-wise, from the order summaries kept on the phone; each point names its order date.

1

Date-wise synopsis

One point per order: what happened, directions, interim orders.

2

Every point dated

The order date (and number) is given, so it can be checked against the order.

3

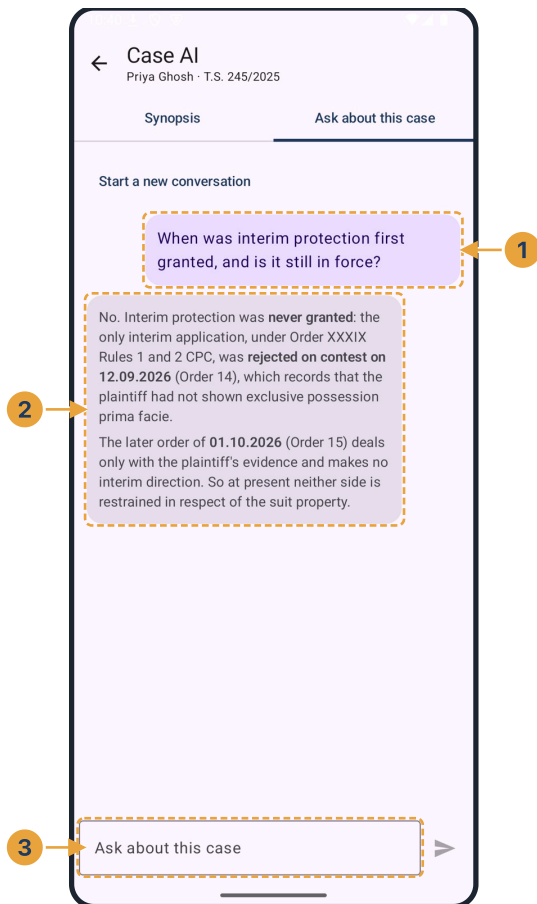

Where it stands now

Status, interim protection in force, the next date.

4

Points to watch

Deadlines and compliances worth checking.

Ask about this case

Only the passages of the orders that match the question are sent, found on the phone by words and by meaning.

1

Your question

Type it, or tap a suggestion.

2

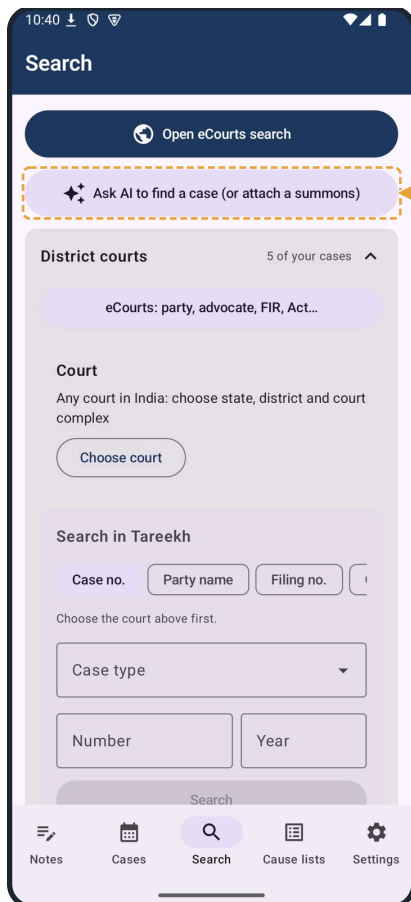

The answer

From the matching passages; each point names its order date.

3

Follow-up questions

Ask as many as you like.

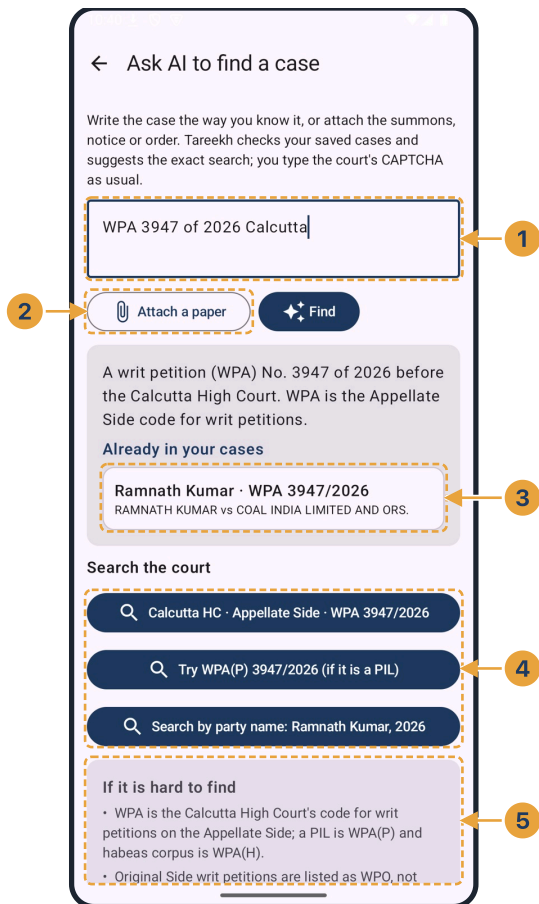

Ask AI to find a case

A new button on the Search tab, and "Not sure? Ask AI" under each court.

1

Ask AI to find a case

Write the case the way you know it, or attach the summons.

The case, found

Tareekh checks your saved cases first, then suggests the exact searches.

1 In your own words

"WPA 3947 of 2026 Calcutta", "CS 213819/26 Bankshall, can't find it"...

2 Attach a paper

A summons, notice, order or WhatsApp photo: read on the phone first.

3 Already in your cases

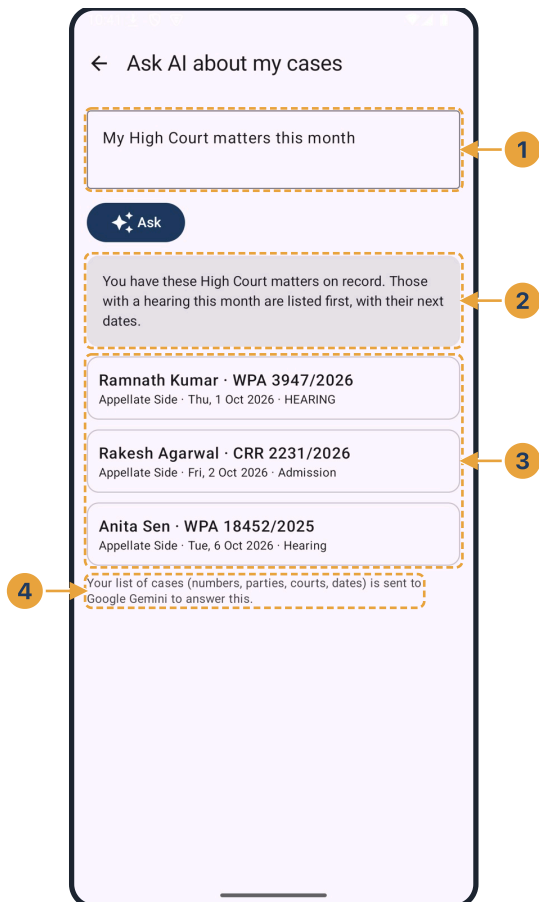

Or "New case: not in your saved cases".

4 Search the court

Tap one: the usual search opens, with the court's CAPTCHA in Tareekh.

5 If it is hard to find

Common mix-ups: case-type codes, sides, filing numbers, years.

Ask AI about my cases

On the Cases tab: questions about your own list of cases.

1

Your question

"My High Court matters this month", "Lower court hearings next week"...

2

The answer

A short answer...

3

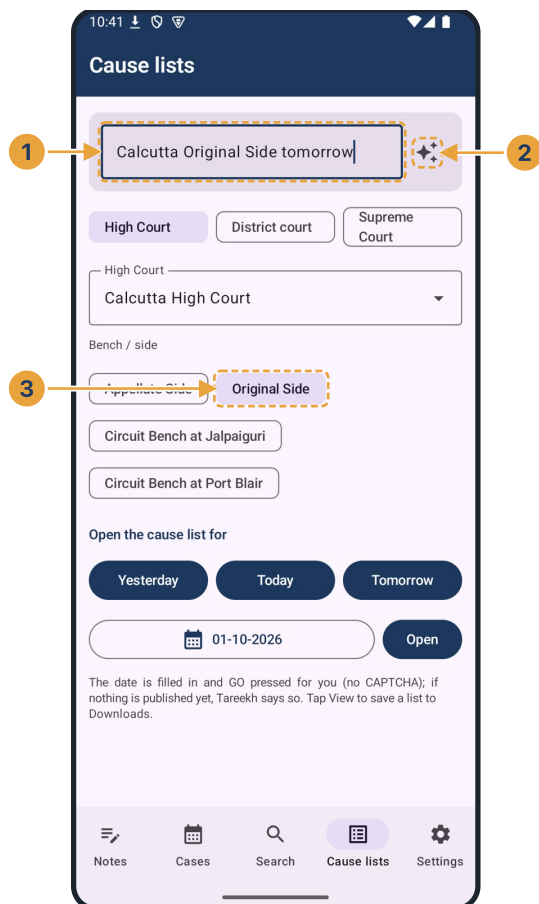

The cases

...and the cases it is about; tap one to open it.

4

What is sent

Your list of cases goes to the AI service you chose, to answer.

Cause lists in plain words

On the Cause lists tab: ask for a list the way you would say it.

1

In plain words

"Calcutta Original Side tomorrow", "Alipore court Monday".

2

Open

Tareekh picks the court, bench and date, and opens the list.

3

Chosen for you

The court and bench it understood.

Also in Tareekh

- 2.3: Check here and Check all here, with only the court's CAPTCHA.
- 2.2: explain an order, appeal forum and last date, questions about an order.
- 2.1: search inside Tareekh for every court.

Tareekh 2.4 · made by Patra's Law Chambers, Kolkata and New Delhi · patraslawchambers.com · +91 890 222 4444

Tareekh opens the public case status pages of eCourts, the High Courts and the Supreme Court; you type every CAPTCHA. Not affiliated with eCourts, NIC or any court. Screens shown use made-up example cases.
